**LARGER UTILIZATION RANGE
→ MORE FLEXIBILITY**

Optimized block arrangement

✓ Improved stability under braking and high grip during cornering

X30R (Medium)

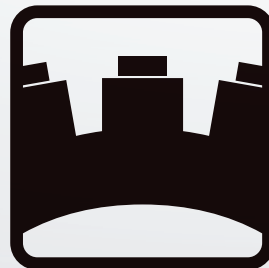

X40R (Hard)

Molding of an extra block within the first one.

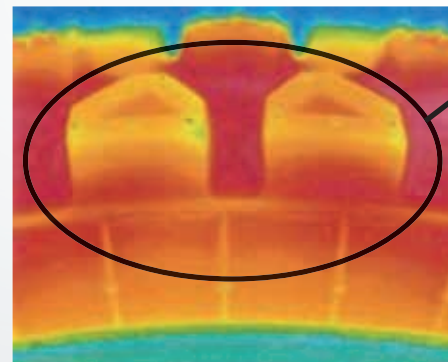

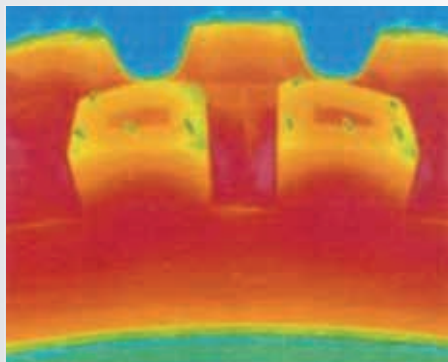

- The castle block has a convex section in its block to enhance traction power by extra edge effect.
- The castle block design is applied on both X30 and X40 rear tyre in order to have flexible tyre response on surface changes.
- The additional edge effect provides higher cornering grip and traction on different types of terrain.
- This enhance the working range of both X30 and X40 tyres.

- ✓ Consistent grip when changing surface due to optimized "edge effect"
- ✓ Increasing of acceleration and cornering performances
- ✓ Effective on slippery surfaces

Bridgestone's technology already used on run-flat tires. Rear tire is equipped with fins on the side wall to enhance cooling effect

Less heat generated by the repetition of bending the sidewall at low tire pressure

✓ Less degradation and consistent performance over the life of the tyre

X30R (Medium)

X40R (Hard)

	Size	LI/SS	X30F (Medium)	X40F(Hard)
Front	80/100-21	051M	X	X
